

Air 1 is a great radio station to have in my community. It is the only station that plays christian music that isn't all gospel. It plays up beat music that alot of people like to listen to now-a-days. It is one of the few radio stations out there that you don't have to monitor because of bad language. Air 1 is a great family radio station and should have control over what is played on their station. If a LPFM broadcaster the community wouldn't listen to air 1 as much as they do now. I live in a small community, but I do know of some people that do listen to Air 1.
